

## **REMARKS**

Applicant respectfully requests reconsideration of this application as amended. Claims 1, 16 and 24 have been amended. Claims 4, 6-15, 17-18 and 28-30 have been previously cancelled. No new claims have been added. Therefore, claims 1-3, 5-16 and 19-27 are presented for examination. The following remarks are in response to the final Office Action, mailed July 17, 2006 and the advisory action mailed thereafter.

### **35 U.S.C. § 112 Rejection**

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 has been amended, which obviates the rejection. Applicants respectfully request the withdrawal of the rejection of claim 1.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 has been cancelled without prejudice.

### **35 U.S.C. § 102 Rejection**

Claims 1-5, 16 and 19-27 stand rejected under 35 U.S.C. §102(e), as being anticipated by Bookman et al., U.S. Patent Publication No. 2003/0050929 (“Bookman”).

Claim 1, as amended, recites:

A method comprising:  
receiving content from one or more content sources;  
distributing a metadata dictionary to a plurality of network nodes, wherein  
the metadata dictionary comprises content descriptors;

receiving subscription information from the plurality of network nodes;  
matching the content and the subscription information to form an  
aggregate content bit for the plurality of network nodes;  
creating a rating survey via the subscription information, the rating survey  
to maximize allocation of bandwidth, the rating survey including  
user data;  
allocating the bandwidth according to the rating survey;  
generating an aggregated content stream based on the allocated bandwidth,  
wherein the aggregated content stream comprises aggregated  
content; and  
distributing the aggregated content stream to a plurality of filtering  
network nodes, wherein the aggregated content stream is filtered  
via filtering hubs located at the plurality of filtering network nodes.  
(emphasis added)

Bookman discloses “automatically build a database by automatically assigning  
links to an expert, pushing content to an expert, providing expert annotation, and linking  
the content to an annotation database.” (Abstract) Bookman further discloses “data  
objects to execute limiting rules without requiring a connection to the database.” (Abstract)  
Bookman does not teach or reasonably suggest “matching the content and the  
subscription information to form an aggregate content bit for the plurality of network  
nodes . . . [and] creating a rating survey via the subscription information, the rating  
survey to maximize allocation of bandwidth, the rating survey including user data” as  
recited by claim 1. Accordingly, Applicants respectfully request the withdrawal of the  
rejection of claim 1 and its dependent claims.

Claims 16 and 24 contain limitations similar to those of claim 1. Accordingly,  
Applicants respectfully request the withdrawal of the rejection of claim 16 and 24 and  
their dependent claims.

### **Conclusion**

In light of the foregoing, reconsideration and allowance of the claims is hereby earnestly requested.

**Invitation for a Telephone Interview**

The Examiner is requested to call the undersigned at (303) 740-1980 if there remains any issue with allowance of the case.

**Request for an Extension of Time**

Applicant respectfully petitions for an extension of time to respond to the outstanding Office Action pursuant to 37 C.F.R. § 1.136(a) should one be necessary. Please charge our Deposit Account No. 02-2666 to cover the necessary fee under 37 C.F.R. § 1.17(a) for such an extension.

**Charge our Deposit Account**

Please charge any shortage to our Deposit Account No. 02-2666.

Respectfully submitted,

BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN LLP
